

## **IN THE SPECIFICATION**

**Please amend the paragraph beginning at page 12, line 5 as follows:**

The control section 17 also generates a game scene of the battle-type video game based on the game program reproduced by the optical disk reproduction section 15 and operation ~~thorough~~ through the controller 2 by the player, and then displays such scene on the display device 18 after processing by the display processing section 16.

**Please amend the paragraph beginning at page 26, line 26 as follows:**

Next, in step S14, the control section 17 detects the player's voice tone based on the level detection output from the voice level detection section 12 and the analytical result of the meaning of the player's voice from the voice recognition section 13, and then registers the detection result into tone groups classified by voice tones in step S15.
